CLAUSE-2 COMPENSATION FOR DELAY

The time allowed for carrying out the work as entered in the tender shall be strictly observed by the contractor and shall be deemed to be the essence of the contract on the part of the contractor and shall be reckoned from the fifteenth days after the date on which the order to commence the work is issued to the contractor. The work shall throughout the stipulated period of the contract the proceeded with all due diligence and the contractor shall pay as Compensation as amount equal to one percent of such smaller amount as the Superintending Engineer (whose decision in writing shall be final) may decide on the amount of the tendered cost of the whole work as shown in the tender for every day that the work remains uncompleted or unfinished, after the proper dates. And further, to ensure good progress during the execution of the work, the contractor shall be bound in all cases in which the time allowed for any work exceeds one month save for special job to complete one eighth of the whole of the work .

Before one forth of the whole time allowed under the contract has elapsed, three-eighth of the work, before on half of such time has elapsed and three fourth of the work, before of such time as elapsed .

However for special jobs if a time -schedule has been submitted by the contractor and the same has been accepted by Engineer-in-charge, the contractor shall comply with the said time schedule. In the event of the, contractor failing to comply with his condition, he shall be liable to pay as compensation an amount equal to one percent or such smaller amount as the Superintending Engineer (whose decision in writing shall be final), may decide on the said tendered cost of the whole work for every day that the due quantity of work remains incomplete, provided always that the entire amount of compensation to be paid under the provisions of this clause shall not exceed ten percent, on the tendered cost of the work as shown in the tender .

CLAUSE-3:- The Engineer-in-charge may without prejudice to this against the contractor in any respect of any delay or inferior workmanship or otherwise or to any claims for damage in respect of any breaches of the contract and without prejudices to any rights or remedial under any of the provision of this contract or otherwise and whether the date for completion has or has not elapsed by notice in writing absolutely determine the contract in any of the following case.

(i) If the contractor having been given by the Engineer-in-charge in writing to rectify, reconstruct or replace any defective work or that the work is being performed in any inefficient or otherwise improper or unworkman like manner shall omit to comply with the requirements of such notice for a period of the seven days thereafter or if the contractor shall delay or suspend the execution of the work so that either in the judgment of the Engineer-in-charge (which shall be final and binding) he will be unable to secure completion of the work by the date for completion or he has already failed to complete the work by the date .

(ii) If the contractor being a company shall pass a resolution or the court shall make an order that the company shall be bound up or if a receiver or manager on behalf of a creditor shall be appointed or if circumstances shall arise entitle the Court to make a winding up or e.g.

(iii) If the contractor commits breach of any of the terms and conditions of this contract.

(iv) If the contractor commits any acts mentioned in Clause-21 hereof.

When the contractor has made himself liable for action under any of the cases aforesaid, the Engineer-in-charge on behalf of the Governor of Himachal Pradesh shall have powers :-

(a) To determine or rescind the contract as aforesaid (of which termination or rescission notice in writing to the contractor under the hand of the Engineer-in-charge shall be conclusive evidence). Upon such determination or rescission the security deposit of the contractor shall be liable to be forfeited and shall be absolutely at the disposal of Government.

(b) To employ labour paid by the IPH Department and to supply materials to carry out the works or any part of the work deleting the contractor, with at the cost of the labour and the price of the materials (of the amount of which cost and price certified by the Engineer-in-charge shall be final and conclusive against the contractor) and crediting him with the value of the work done in all respects in the same manner and at the same rates as if it had been carried out by the contractor, under the terms of his contract .The certificate of the Executive Engineer as to the value of the work done shall be final and conclusive against the contract or provided also that if the expenses incurred by the department are less than the amount payable to the contractor at this agreement rates, the differences shall not be paid to the contractor .

(c) After giving the notice to the contractor to measure up the work of the contractor and to take such part thereof as shall be unexecuted out of his hands and to give it to another contractor to complete in which case any expenses which may be incurred in excess of the sum which would have been paid to the original contractor if the whole work had been executed by him (of the amount of which excess the certificate in writing of the Engineer-in-charge shall be final and conclusive) shall be borne and paid by the original contractor and may be deducted from any money due to him by Government under this contract or any account whatsoever or from his security deposit or the proceeds of sales thereof or a sufficient part thereof as the case may be .

In the event of any one or more of the above courses being adopted by the Engineer-in-charge the contractor shall have no claim to compensation for any loss sustained by him by reason of his having purchases all procured any materials or entered into any engagements or made any advances on account or with a view to the execution of the work or the performance of contract. And in case action is taken under any of the provisions aforesaid, the contract shall not be entitled to recover or be paid any sum of any work thereto for actually performed under the contract unless and until the Engineer-in-charge has certified in writing the performance of such work and the value payable in respect thereof and he shall only be entitled to be paid the value so certified.

Contractor of remain liable to pay compensation if action not taken under clause 3 powers to or take possession of or removal of contractors plant.

CLAUSE-4 In any case in which any of the powers conferred upon the Engineer-in-charge by clause 3 hereof, shall have become exercisable and the same shall not be exercised the non-exercise thereof shall not constitute a wavier of any of the conditions hereof and such powers shall notwithstanding be exercisable in the event of any future case of default by the contractor and the liability of the contractor for compensation shall remain unaffected. In the event of the Engineer-in-charge putting in force all or any of the powers vested in him under the proceeding. Clause he may, if he show desires after giving a notice in writing to the contractor take possession of (or at the sole discretion of the Engineer-in-charge which shall be final) use as on hire (the amount of hire money being also in the final determination of the Engineer-in-charge) all or any tools, plant, materials and stores, in or upon the works of site thereof, belonging to the contractor, or procured by contractor if intended to be used for the execution of the work or any part thereof, paying or allowing for the same in account at the contract rates, or in the case of these not being applicable at current market rates to be certified by the Engineer-in -charge ,whose certificate thereof shall be final, otherwise the Engineer- in charge by notice in writing may order the contractor or his clerk or the works foreman or other authorize agent to remove such tools, plant .materials or stores from the premises (within a time to be specified in such notice),and in the event of the contractor failing to comply with any such requisition , the Engineer- in- charge may remove them at the contractor 's expenses or sell them by auction or private sale on account of the contractor and at his risk in all respects and the certificate of the Engineer- in-Incharge as to the expenses of any such removal and the amount of the proceeds and expense of any such sale shall be final and conclusive against the contractor.

CLAUSE-5: EXTENSION OF TIME

If the contractor shall desire an extension of time for completion of work the grounds of his having been unavoidably hindered in its execution or on any other ground, he shall apply in writing to the Executive Engineer within 30 days of the date of hindrance on account of which he desires such extension as aforesaid and the Executive Engineer shall, if in his opinion (which shall be final) reasonable grounds be shown therefore, authorizes such extension of time, if any, as may, in .?Opinion be necessary or proper.

CLAUSE-6: COMPLETION CERTIFICATE

Within ten days of the commotion of the work the contractor shall give notice of such completion to the Engineer -in -charge and within ten / thirty days of the receipt of such notice, the Engineer-in -charge shall inspect the work and if there is no defect in the work. He shall furnish the contractor with a certificate of completion otherwise a provisional certificate of completion, indicating defect(s) to be rectified by the contractor and / or (b) for which payment will be made at reduced rates, shall be issued but no certificate of completion, provisional or otherwise, shall be issued , nor shall work be considered to be completed until the contractor shall have removed from the premises on which the work was executed all scaffolding surplus materials, rubbish and all huts and sanitary arrangements required for his/ their work, people on the site in connection with the execution of the work as shall have been erected or constructed by the contractor (s) and cleaned off the dirt from ll wood work, door, windows, wall , floors or other parts of any building in , upon or about which work is to be executed or of which he may have had possession for the purpose of the execution thereof and not until the work shall have been measured by the Engineer- in -charge. If the contractor shall fail to comply with the requirements of this clause as to removal of scaffolding surplus materials and rubbish and all huts and sanitary arrangements as aforesaid and cleaning of dirt on or before the date fixed for the completion of the works, the Engineer- in -charge may at the expense of the contractor remove such scaffolding, surplus material and rubbish etc. and dispose of the same as he thinks fit and clean off such dirt as aforesaid and the contractor shall have no claim in respect of any scaffolding or surplus materials as aforesaid except for any sum actually realized by the sale thereof.

CLAUSE - 6A: When the annual repairs and maintenance works is carried out , the splashes and dropping from white washing , color washing ,painting etc, walls floors , doors , windows etc. shall removed and the surface cleaned simultaneously with the completion of those item of work in the individual rooms, quarters of premises etc. Whet her the work is done without waiting for the actual completion of all other items of work in the contract, In case the contactor fails to comply with requirements of this clause , the Engineer -in -charge shall have the right to get his work done at the cost of contractor , either departmentally or through another agency . Before taking such action ,the Engineer -in - charge shall give two days notice in writing to the contractor

N.B. Ten days will apply in the case of work at the head quarters of the Engineer -in -charge and thirty days will apply in the case of works at a station under then the headquarters of Engineer -in-charge .

CLAUSE-7: Payment of interment at certificate to be regarded as advance. No payment shall be made for work estimated cost rupees five thousand or less till after the whole or the work shall have been completed and certificate of completion given. But in the case of work estimated to cost more than rupees five thousand the contractor shall on submitting the bill thereof be entitled to receive a monthly payment proportionate to the part thereof than executed to the satisfaction of the Engineer- in -charge whose certificate of the sum so payable shall be final and conclusive against the final payment only and not as payments for work actually done and completed and shall not preclude the requiring of bad, unsound and imperfect or unskilled work to be removed and taken away and reconstruction or re - erected or be considered as an admission of the due performance of the contract, or any part thereof, in any respect or the accruing of any claim, nor shall it conclude, determine or affect in any way the powers of the Engineer- in -charge under these conditions or any of them as to the final settlement and adjustment of the accounts or otherwise or in any other way vary or affect the contract. The final bill shall be submitted by the contractor within one month of the date fixed for the completion of the work or of the date certificate of completion furnished by the additional items is up to Rs. 2 Lakhs and in 6 month of the same exceeds Rs. 2 Lakhs of the submission of the bill. If there shall be any dispute about any items or times of the work then the undisputed item or items only shall be paid within the said period of three month or six months as the case may be. The contractor shall submit a list of the disputed item within the 30 days from the disallowance thereof and if he fails, to do this, his claim shall be deemed to have been fully waived and absolutely extinguished.

CLAUSE-7A: Whenever there is likely to be delay in recording detailed measurements for making a running payments in the case of residential buildings, advance payments without detailed measurements for work done other than foundation and finishing items up to

(a) Lintel level (including sun shade etc.) and

(b) Slab level for each floor worked out as 75% of the tendered rates may be made in running accounts bills by the Engineer- in -charge, in his direction on the basis of a certificate from the Assistant Engineer to the effect that the work has been completed up to level in question. The Advance payments so allowed shall be adjusted in the subsequent running bills by taking detailed measurements thereof. Final Payments shall be made only on the basis of detailed measurements.

CLAUSE -8: Bill to be submitted Monthly

A bill shall be submitted by the contractor each month on or before the date fixed by the Engineer-in-charge for all work executed in the previous month and the Engineer -in-charge shall take or cause to be taken the requisite measurement for the purpose of having the same verified and the claim as far as admissible ,adjusted as far as possible before the expiry of ten days from the presentation of the bill. If the contractors does not submit the bill within the time fixed as aforesaid, the Engineer -in-charge may depute with seven days of the date fixed as aforesaid, a subordinate to measure up the said work in the presence of the contractor whose countersignature to the measurement list will be sufficient and the Engineer-in-charge may prepare a bill from such list.

CLAUSE-8A: Contractor's to be given a week to file objections to the measurements recorded by Department before taking any measurement of any work as has been referred to in clause 6,7 and 8 hereto the Engineer -in-charge or a subordinate deputed by him shall give reasonable notice to the contractor .If the contractor fails to attend at the measurements after such notice or fails to countersign or to record the difference with in a week from the date of measurement in the manner required by the Engineer -in-charge then in any such event the measurements taken by the Engineer -in-charge or by the subordinate deputed by him as the case may shall be final and binding on the contractor and the contractor shall have no right to dispute the same .

CLAUSE 9: Bill to be on Printed Forms

The contractor shall submit all bills on the printed forms to be had on application from the office of the Engineer -in-charge and the charges in the bills always be entered at the rates specified in the tender or in the case of any extra works ordered in pursuance of these conditions and not mentioned or provided for in the tender at the rates hereinafter provided for such work.

CLAUSE 9A: Payment of Contractors Bills to Bank

Payment due to the contractor may, if so desired by him be made to his bank instead of direct to him, provided that the contractor furnishes to the Engineer -in- charge (1) authorization in the form of a legally valid document such as a power of attorney conferring authority of the bank to receive and (2) his own acceptance of the correctness of the account made out as being due to him by Government or his signature on the bill or other claim preferred against Government, before decrement by such bank shall constitute discharge for the payment the contractor should wherever possible, present his duly receipted and discharged through his bankers.

CLAUSE 10: Stores Supplied by Government

If the specifications of schedule of items provided for the use of any special materials to be supplied from Engineer-in -charge 's stores, or if it is required that the contractor shall use certain stores to be provided by the Engineer - in -charge as shown in the schedule of materials here to annexed, the contractor shall be bound to procure and shall be supplied such material and stores as are from time to time required to be used by him for the purpose of contract only and the value of the full quantity of materials and stores so supplied at the rates specified in the said schedule of materials may be set off or otherwise, or against or from the security deposit, or the proceeds of sale thereof if the same is held in Government securities, the same or a sufficient portion thereof being in this case sold for the purpose. All materials so supplied to the contractor shall remain the absolute property of the Government and shall not be removed on any account from the site of the work and shall be at all time open to inspection by the Engineer- in -charge. Any such materials remaining unused and in perfectly good condition at the time of the completion or termination in the contract shall be returned to the Engineer- in - charge at a place directed by him, if by a notice in writing under no hand be hand be shall so require but the contractor shall not be entitled to return any such material unless with such consent and shall have no claim for compensation on account of any such materials so supplied to him as aforesaid not being used by him or for any wastage in or damages to any such materials. On being required to return the store material the contractor shall hand over the stores / material on being paid or credited such prize as the Engineer- in- Charge shall determine having due regard to the condition for the stores / materials. The price allowed to the contractor, however, shall not exceed the amount charged to him excluding the storage if any. The decision of the Engineer - in -charge shall be final and conclusive. In the event of breach of the aforesaid conditions, the contractor shall in addition to throwing himself open to account for contravention of the terms and of the licenses or permit and / or for criminal breach of trust be liable to Govt. for all advantages or profits resulting or which in the usual course would have resulted to him by reason of such breach. Provided that the contractor shall in no case be entitled to any compensation or damages on account of any delay in supply or non - supply thereof of all or any such material and stores. Provided further that the contractor shall be bound to execute the entire work if the materials are supplied by the Govt. within the scheduled time for completion of the work plus 50 percent thereof (Scheduled time 6 months if the time of completion of the work exceeds 12 months) but if a part only of the materials has been supplied within the aforesaid period, then the contractor shall be bound to do so much of the work as may be possible with the materials and stores supplied in the aforesaid period. For the completion of the rest of the work the contractor shall be entitled to such extension of time as may be determined by the Engineer - in- charge whose decision in this regard shall be final.

Surplus materials which originally procured, by the contractor for themselves can also be taken over by Govt. if required to use, other work in progress only on special arrangements and the prevailing markets rates (i.e. rates at which the articles similar description can be procured at a given time at the stores godown, from the public market suitable to division for the obtaining a supply thereof.

CLAUSE 10 -A: The Engineer - in -charge shall have full power to require the removal from the premises of all materials which in his opinion are not in accordance with the specification and in case of default the Engineer - in -charge is to be at liberty to employ other persons to remove the same without being answerable or accountable for any loss or damages that may happen or arise to such materials. The Engineer -in-charges shall also have full powers to require other proper material to be substituted there of and in case of default the Engineer -in-charge may cause the same to be supplied and all costs which may attend such removal and substitution are to be borne by the contractor.

CLAUSE10-B: The contractor on signing and indenture in the specified by the Engineer -in-charge shall be entitled to be paid during the progress of the execution of the work up to 75% of the estimated value of any material which are in the opinion of the Engineer -in-charge non-perishable and are in accordance with the contract and which have been brought on the site in connection therewith and are in adequately stored and /or protected against damage by weather or other cause but which have not at the time of advance been incorporated in the work. When materials on account of which advance has been made under this sub clause are incorporated in the work the amount of such advance shall be deducted from the next payment made under any of the clause or clauses for this contract.

CLAUSE10-C: Price Escalation

If during the progress of the works, the price of any materials incorporated in the works ,(not being a material supplied from the Engineer -in -charge 's stores in accordance with clause 10 here of and /or wages of labour increases as direct result of the coming into force of any fresh law, or statutory rule order (but not due it any changes in sales tax)and such increases exceeds 10%of the price and for wages prevailing at the time of acceptance of the tender for the works ,and the contractor thereupon necessarily and properly pays in respect of that materials (incorporated in the works)such increased price and /or in respect of labour engaged in the execution of the work such increased wages, then the amount of the contract shall accordingly be varied ;provide always that any increases so payable is not ,in the opinion of the Superintending Engineer (whose decision shall be final and binding) attributable to delay in the execution of the contract with in the control of the contractor.

If during the progress of the works , the price of any material incorporated in the works (not being a material supplied from the Engineer -in-charge's stores in accordance with clause 10thereof)and /or wages of labour is decreased as a direct result of the coming into the force of any fresh low or statutory rule order (but not due to any changes in sales tax) and such decreases exceeds ten percent of the prices and /or wages prevailing at the time of acceptance of the tender of the work . Govt. shall in respect of materials incorporated in the works (not being materials supplied from the Engineer -in-charge 's stores in accordance with clause 10 here of and / or labour engaged on the execution of the work after the date of coming into force of such law , statutory rule or order be entitled to deduct from

the dues of the contractor such amount as shall be equivalent to difference between the prices of the materials and / or wages as they prevailed at the time of acceptance of tender of for the work minus ten percent there of and the prices of materials and / or wages of labour on the coming into force of such law , statutory rule or order .

The contractor shall ,for the purpose of the conditions , Keep such books of account and other documents as are necessary to show the amount of any increase claimed or reduction available and shall allow inspection of the same by duly authorized representative of Govt. and further shall , at the request to the Engineer -in -charge furnish , verified in such a manner as the Engineer -in -charge may require any documents so kept and such other information as the Engineer - in - charge mat require . The contractor shall, within a reasonable time of his becoming aware of any alternation in the price of any such material and / or wages of labour, give notice there of to the Engineer -in -charge stating that the same is given pursuant to this conditions together with all information relating there to which he may be in a position to supply.

Only increase exceeding 10 % on the price of material and / or wages is to be reimbursed and up to 10% increase on the Price of material and / or wages of labour is to be borne by the contractors. No adjustment of profit is allowed under clause 10-C for the extended period.

CLAUSE 10 D: The contractor shall treat all materials obtained during dismantling of a structure excavation of the site for a work etc. as Govt's property and such material shall be disposed of to the best advantage of Govt. according to the instructions in writing issued by the Engineer - in- Charge.

CLAUSE 10 E: (i) Tendered rates are inclusive of all taxes and levies payable under the respective statutes .However pursuant to the constitution (Forty Sixth Amendment) Act. 1982. If any further tax or levy is imposed by Statutes, after the date receipt of tenders and the contractors there upon necessarily and properly pays such taxes / levies the contractor shall reimburse the amount so paid provided such payment, if any, is not in the opinion of Superintending Engineer (whose decision shall be final and binding) attributable to delay in executing of work within the control of the contractor.

(ii) The contractor shall keep necessary books of account and other documents for the purpose of this condition as may be necessary and shall allows inspection of the same by a duly authorized representative of Govt. and further shall furnish such other information / documents as the Engineer -in -charge many require .

(iii) The contractor shall within a period of 30 days of imposition of any further tax or levy. Pursuant to the constitution (Forty Six Amendment) Act, 1982 give a written notice there of to the Engineer -in -charge that the same is given pursuant to this condition together with all necessary information relating there to.

RETURN OF EMPTY CEMENT BAGS:

CLAUSE 10 F: (i) The recovery rate of cement is inclusive of cost of jute or paper bags. The contractor shall have to return at least ninety percent of the cement jute bags in serviceable condition to the bag collecting agents. The payment for the cost of empty cement bags will be made to the contractor by the bag collecting aments at the prevailing rate as fixed of the D.G.S.&D.The contractor shall get the name of the bag collecting agents from the Engineer - in-charge in writing . The contractor must produce the certificate on the printed letter head from the authorized bag collecting agents as proof for the number of bags returned by him. The certificate must be produced by him while claiming payment against each running bill .In case , the number of serviceable bags returned is less than 90% of the bags issued compensation at the rate of rupee 1.26 per bags returned short of the minimum number shall be recovered from the contractor .

(ii) The contractor should send registered intimation to the Bags collecting agent of the cement factories for collecting the bags within a period of 30 days .If the bag collecting anent fails to turn up within the specified period, the contractor shall be at liberty to dispose of the bags.

(iii) In case the empty cement jute bags the required by HP IPH for bonafide use in work the Executive Engineer - in- charge of the work shall have powers to collect the bags himself and the contractor shall have to return the desired the empty jute bags in serviceable condition to him on the same condition as for bag collecting agents.

CALUSE 11: Work to be executed in accordance with specifications, orders, drawing etc.

The contractor shall execute the whole and every part of the work in the most substantial and work man like manner both as regards materials and every respect in strict accordance with the specifications .The contractor shall also conform exactly , fully and faithfully to the designs , drawings and instructions in writing in respect of the work signed by the Engineer-in-charge and the contractor shall be furnished free of charge one copy of the specification, and of all such designs ,drawings and instructions as are not included in the H.P.IPH Department compilation entitled specification of work 1987 Vol - I in force from time to time or any other publication on general specification referred to elsewhere in the contract .

CALUSE 12: Alterations in Specifications and Designs.

The Engineer-in-charge shall have power to make any alteration in , omission from additions to or substitution for , the original specification , drawing designs and instructions , that may appear to him to be necessary during the progress of the work , and the contractor shall carry out the work in accordance with any instructions witch may be given to him in writing signed by the Engineer-in -charge , and such alterations , omission , additions or substitutions shall not invalidate the contract and any altered additional or substituted work which the contractor may be directed to do in the manner above specified as part of the work shall be carried out the contractor on the same conditions in all respect on which he agreed to do the main work . The time for the completion of the work shall be extended in the proportion that the altered ,additional or substituted work bears to the original contract work ,and the certificate of the Engineer-in-charge shall be conclusive as to such proportion .Over an above this , a further period to the extent of 25% of the time so extended shall be allowed to the contractor .The rates for such additional , altered or substituted work under this clause shall be worked out in accordance with the following provisions in their respective order.

(i) If the rate for the additional altered or substituted work is specified in the contract of work the contractor is bound to carry out the additional, altered or substituted work at the same rates as are specified in the contract for the work.

(ii) If the rate of the additional, altered or substituted work is not specifically provided in the contract for the work, the rate will be derived from the rates for a similar class of work as are specified in the contract for the work.

(iii) If the altered, additional or substituted work includes any work for which no rate is specified in the contract for the work and can not be derived from the similar class of work in the contract then such work be carried out the rates entered in H.P. Schedule of Rates with up to the date correction of tender minus / plus percentage which the total tendered amount bears to the estimated cost of entire work put to tender.

(iv) If the rates for the altered additional or substituted work can not be determined in the manner specified in clause (i) to (iii) above, then the rates for such work shall be worked out on the basis of the schedule of rates of the district specified above minus / plus the percentage which the total tendered amount bears to the estimated cost of the entire work put to tender. Provided always that if the rate for a particular part or part of the item is not in the schedule rates, the rate for such part or parts will be determined by the Engineer-in-charge on the basis of prevailing market rate when the work was done.

(v) If the rates for the altered, additional or substituted work can not be determined in the manner specified in sub clause (i) to (iv) above, then the contractor shall, within 7 days to the date of receipt of order to carry out the work, in form the Engineer-in-charge of the rate which it is his intention to charge for such class of work, supported by analysis of the rates claimed and the Engineer-in-charge shall determine the rate or rates on the basis of prevailing market rates and pay the contractor accordingly. However, the Engineer-in-charge, by notice in writing will be at liberty to cancel his order to carry out such class or work and arrange to carry it out in such manner as he may consider advisable. But under no circumstances, the contractor shall suspend the work on the plea of non settlement of rates of items falling under this clause.

(vi) Except in case of the item relating to foundation, provisions contained in sub clause (i) to (v) above shall not apply to contract or substituted items as individually exceed the percentage set out in the tender document (referred to herein below as "deviation limit") subject to the following restriction :-

(a) The deviation limit referred to above is the net effect (algebraical sum) of all additions and deduction ordered.

(b) In no case shall the additions / deductions (arithmetical sum) exceed twice the deviation limit.

(c) The deviations ordered on items of any individual trade included in the contract shall not exceed plus / minus 50% of the value of that trade in the contract as a whole or half the deviation limit whichever is less.

(d) The value of additions of items of any individual trade not already included in the contract shall not exceed 10% of the deviation limit. For the purpose of operation of clause 12 (VI) the following works shall be treated as work relating to foundations.

(a) For building plinth level or 1.2 meter (4ft.) above ground level whichever is lower, excluding items for flooring and DPC but including base concrete below the floors.

(b) For abutments piers, retaining walls of the culverts and bridges walls of the water reservoirs, the bed or floor level.

(c) For retaining wall where floor level is not determinate 1.2 meters above the average ground level or bed level.

(d) For roads, all items of excavation and filling including treatment or sub base and soling work.

(e) For water supply lines, sewer lines, under ground Storm water drains and similar work all items of work below ground level except items of pipe work proper masonry work.

(f) For open storm water drains all items of work except lining of drains.

Note : Individual trade means the trade sections into which a schedule of quantities annexed to the agreement has been divided or in the absence of any such division the individual sections of the H.P. IPH Department Schedule of Rates specified above such as excavation and earth work, concrete, wood work & Journey etc. The rates of any such work except the items relating to foundations which is in excess of the deviation limit shall be determined in accordance with the provisions contained in clause 12-A.

CLAUSE 12 A:- In the case of contract, of substituted items which individually exceed the quantity stipulated in the contract by more than the deviation limit except the items relating to foundation work which the contractor is required to do under clause 12 above the contractor shall within 7 days from the receipt of order claim revision of the rates supported by proper analysis in respect of such item for quantities in excess of the deviation limit notwithstanding the fact that the rates for such items exist in the tender for the main work or can be derived in accordance with the provision of sub clause (ii) of clause 12 and the Engineer-in-charge may revise their rates, having regard to the prevailing market rates and the contractor shall be paid in accordance with the rates so fixed. The Engineer-in-charge shall, however, be at liberty to cancel his order to carry out such increased quantities of work by giving notice in writing to the contractor and arrange to carry it out in such manner as he may be considered advisable. But, under no circumstances the contractor shall suspend the work on the plea of non settlement of rates of items falling under this clause.

All the provision of the preceding paragraph shall equally apply to the decrease in the rate of items for quantities in excess of the deviation limit, notwithstanding the fact that the rates for such items exist in the tender for the main work or can be derived in accordance with the provisions of sub clause (ii) of the preceding clause 12 and the Engineer-in-charge may revise such rates having regard to the prevailing market rates.

CLAUSE 13: No compensation for alteration in the restriction of work to be carried out.

If at any time after the commencement of work the Governor of H.P. shall for any reason what so ever not require the whole work there of as specified in the tender to be carried out Engineer -in-charge shall give notice in writing of the fact to the contractor who shall have no claim to any payment of compensation whatsoever on account of any profit or advantages which he might have derived form the execution of the work in full, but which he did not derive i n consequence of the full amount of the work not have been carried out, neither shall he have any claim for compensation by re4ason of an alternations having been made in the original specifications , drawing , designs and instructions which shall involve any curtailment of the work as originally contemplated ..

Provided that the contractor shall be paid the charges on the carriage only of materials actually and bonafide brought to the site of the work by the contractor and rendered as a result of the abandonment or curtailment of the or any portion thereof and then taken back by the contractor, provided however, that the Engineer -in-charge shall have in all such cases the option of taking over all or any such materials at their purchases price or at local current rates whichever may be less. In the case of such stores, having been issued from Govt. stores, supervision charges and storage charges shall be refundable in addition to the issue fate of the material .In the case of such stores having been issued from Govt. stores and returned by contractor to Govt. stores credit shall be given to him by the Engineer -in-charge at rates not exceeding those at which were originally issued to him after taking into consideration and deduction for claims on Engineer -in -charge shall be final this respect the custody of the contractor and in this respect the decision of the Engineer -in-charge shall be final

CLAUSE -14: Action and compensation in case of bad work

If it shall appear to the Engineer -in - charge or his subordinate in charge of the work that any work has been executed with unsound , imperfect or unskilled workmanship or with materials of any inferior description or that any materials or articles provided by him for the execution or the work unsound or of a quality inferior to that contracted for or other wise not in accordance with the contract the contractor shall on demand in writing which shall be made with in six months of the completion of the work from the Engineer-in -charge specifying the work , materials of or article complained of not with standing that the same may have been passed certified and paid for forthwith rectify or removal and reconstruct the work so specified in whole or in part as the case may require or as the case may be , remove the materials or articles so specified an provide other proper and suitable materials or articles at his own proper charge and cost and in the event of his failing to do so within a period be specified by the Engineer in charge in his demand aforesaid , then the contractor shall be liable to pay compensation at the rate of one percent on the tendered cost of the work for every day not exceeding 10 days , while his future to do so small continue and in the case of any such failure ,the Engineer-in - charge may rectify or remove an re-execute the work or remove an replace with other , the materials or articles complained of as the case may be at the risk and expenses in all respect of the contractors .

CLAUSE 15: Work to be opened to inspection

All work under or in course of execution or executed in pursuance of the contract shall at all time be open to the inspection and supervision of the Engineer -in- charge and his authorized subordinates and the contractor shall at all times during the usual working hours and at all other times at which reasonable notice of the intention of the Engineer -in - charge or his subordinate to visit the work shall have been given to the contractors , either himself be present to receive orders and instructions , or have a reasonable agent duly accredited in the writing present for the purpose .Orders given to the contractors agent shall be considered to have the save force as if they had been given to the contractor him self .

Any breach of this condition by the contractor would tender him liable to be removed from the approved list of the contractors of this department.

Note: By the terms relatives , is meant wife , husband parents and grants parents , children and grant children brothers and sisters, uncles and cousin and their corresponding -in-laws.

CLAUSE 41: No Engineer of Gazetted rank of other Gazetted Officer employed in Engineering or administrative duties in an IPH Department of Himachal Pradesh Government his allowed to work as contractor for period of two years of his retirement from Government Service without previous permission of Himachal Pradesh Government .The contract is liable to be cancelled if either to the contractor or any of his employees is found at any time to be such a person who had not obtained the permission of Himachal Pradesh Government as aforesaid , before submission of the tender or engagement in the contractor 's service as the case may be .

CLAUSE 42(i) The contractor shall see that only the required quantities of materials are got issued .Any such material remaining unused and in perfectly good condition at the time of completion or termination of the contract shall returned to the Engineer -in-charge at a place where directed by him, if by a notice in writing under his hand, he shall so require. Credit for such material will be given at the prevailing market rate not exceeding the amount charged from him, excluding the storage charge levied at the time of issue of the materials to him. The contractor shall also not be entitled to cartage and incidental charge for returning the surplus material from to the stores where from they were issued.

(ii) After the completion of work the theoretical quantity of cement to be used in the work shall be calculated on the basis of HP PWD statement showing quantity of cement to be used in different items of work provided in the HP Schedule of rates or in cases of non schedule items , It shall be calculated on the basis of standard formula laid down by Superintending Engineer of the concerned circle .

Over this theoretical quantity of cement shall be allowed a variation up to 5% Plus /minus for works the tendered cost of the work not more then Rs.2 lacs, up to 4%Plus/minus for works tendered cost of the works is more then Rs.2 lakhs up to Rs. 5 lakhs and up to 3 % Plus /minus for works the tendered cost of works in above 5 laves. The difference in quantity of cement actually issued to the contractor and the theoretical quantity including authorize variations ,if not returned by the contractor , shall be recovered at twice the issue rate including storage charges , without prejudice to the provision of the relevant conditions regarding return of materials Governing the contract. In the event of it being discovered that the quantity of cement used is less than the quantity ascertained as herein before provided (allowing variations on the minus side as stipulated above) the cost of the quantity of cement not used recovered from the contractor on the basis of stipulated issued rate including storage charges and cartage to site .

(iii) The provisions of the foregoing sub-clause shall apply in the case of steel reinforcement of structural steel section , except that theoretical quantity of steel shall be taken as the quantity required as per design or as authorized by the Engineer -in -charge, including authorized lap -pages , Plus 5% wastage due to cutting in to pieces . Over this theoretical quantity, Plus 5% and minus 4% shall be allowed as variation due to wastage being less.

(iv) After the completion of the work, the actual quantity of cables (other than under -ground cables) wires , conduits/G.I.pipes/ G.I./M.S. sheets used in the various items of works shall be calculated on the basis of the measurements recorded in the measurement works books for purpose of payment and for assessing he consumption of materials used in works. The differences in quantity of material actually issued to the contractor and quantity recorded in the Measurement Book including the authorized variation as stated above if not returned by the contractor shall be recovered at twice the issue rate including storage charges and cartage to site without prejudice to the provisions of the relevant conditions regarding returned of materials governing the contract.

(v) The provision made above are without prejudice the right of the Government to take action against the contractor under the condition of the contract for not doing the work according to the prescribed specification

(vi) After the completion of the work , theoretical quantity of bitumen to be used on work shall be calculated on the basis of HP PWD statement showing quantities bitumen to be used in different items of work provided in the H.P. Schedule of Rates or in respect of agreement which do not provide for or authorized application of the HP Schedule of Rates the theoretical quantity of bitumen to be used on work shall be calculated on the basis of standard formula as laid down by Superintending Engineer of the concerned circle . Over the said theoretical quantity of bitumen, a variation up to plus (excess) 2-1/2percent shall be allowed.

The agreements which provide for free supply of bitumen , the value or price of the difference in the quantity of bitumen actually issued to the contractor and the theoretical quantity including the above mentioned authorized variation if not returned by the contractor shall be recovered at twice the issue rate of Rs.....per M. T. i/c storage charges without prejudice to the relevant conditions in the agreements regarding return of materials . In the event of it being discovered the quantity of bitumen used by the contractor is less than the quantity calculated in the manner aforesaid, there shall be no recovery for less use of bitumen (no variation on the lower side shall be allowed) . The cost of the quantity of bitumen not so used shall be recovered from the contractor on the basis of stipulated issue rate including storage charge there of up to site .

The agreement which provides for supply of bitumen at a fixed rate , the value of price of differences in the quantity of bitumen actually issued to the contractor and the theoretical quantity including the above mentioned authorized variation , if not returned by the contractor , shall be recovered at twice the issue rate of bitumen plus cartage to site including storage charges there of without prejudice to the relevant conditions in the agreements regarding return of materials governing the contract.

In the event of it being discovered that the quantity of bitumen used by the contractor is less than the quantity of bitumen calculated in the manner aforesaid (no variation on the lower side shall be allowed), the cost for the quantity of bitumen not so used shall be recovered form the contractor on the basis of stipulated issue rate including storage charge and cartage there of up to site . This is without prejudice to the relevant conditions in the agreements regarding return of materials governing the contract.

In the event of it being discovered that the quantity of bitumen used by the contractor is less than the quantity of bitumen calculated in the manner aforesaid (no variation on the lower side shall be allowed), the cost for the quantity of bitumen not so used shall be recovered form the contractor on the basis of stipulated issue rate including storage charges and cartage there of up to site. This is without to prejudice to the relevant conditions in the agreements regarding return of materials governing the contract.

In the event of it being that the quantity of bitumen by the contractor is less than the quantity of bitumen calculated in the manner aforesaid (no variation on the lower side shall be allowed), the cost for the quantity of bitumen not so used shall be recovered form the contractor on the basis of stipulated issue rate including storage charges and cartage there of up to site. This is without prejudice to declaration of substandard nature of the work done.

CLAUSE 43: The percentage referred to at page (2) of the tender will be deducted from / added to the gross amount of the bill for work done .

CLAUSE 44: Clause pertaining to damage to works in consequence of Hostilities of War like operators.

The work (whether fully constructed or not)and all materials , machine tools and plants , scaffolding , temporary buildings and other things connected there with shall be at the risk of the contractor until the work has been delivered to he Engineer -in -charge and a certificate from him to that effect obtained . In the event of the work or any materials properly brought to the site for in corporation in the work being damaged or destroyed in consequence of hostilities or war like operations , the contractor shall , when ordered in writing by the Engineer - in -charge remove any debris from the site , Collect and properly stack or remove in store all serviceable materials salvaged from the damaged work and shall be paid at the contract rates in accordance with provisions of this agreement for the work of cleaning the site of debris , stacking or removal of serviceable material compensation up to the value of the work originally executed before being damaged or destroyed and not paid for . In case of works damaged or destroyed but not already measured and paid for the compensation shall addressed by the Executive Engineer Rs. 5,000/-and by the Superintending Engineer concerned for a higher amount . The contractor shall be paid for the damage destruction suffered and for restoring the material at the rates based on the analysis of rated tendered for in accordance with the provisions of this agreement. The certificate of the Engineer -in - charge regarding the quality and quantity of material and purpose for which they were collected shall be final and binding on all parties to this contract.

Provided always that no compensation shall be payable for any loss in consequence of hostilities or warlike operations unless the contractor had taken all such precautions against Air Raid as are deemed necessarily by the A.R.P. Officer of the Engineer-in -charge, (b) for any materials, etc not on the site of the work or for any tools and plant, machinery, scaffolding temporary building and other thing not intended for the work.

In the event of the contractor having to carry out reconstruction as aforesaid, he shall be allowed which extension of time for its completion as is considered by the Executive Engineer.

CLAUSE 45: The contractor shall comply with the provisions of the Apprentices Act, 1961 and the rules and superintending Engineer may in his discretion, cancel the contract. The contractor shall also be liable for any pecuniary liability arising on account of any violation by of the provision of the Act.

CLAUSE 46: The contract shall deposit royalty and obtain necessary permit for supply of the Bajri, Kankar etc. from local authorities.

(1) The contractor will produce a certified copy from the Industries department that the royalty has been paid by him on account of excavation of stones and sand from other than PWD, roads or alternatively recovery of the material excavated and utilized in the construction as per the billed quantities shall be recovered by the department.

(2) The contractor shall have to purchase the timber to be used on works from and authorized dealer /agency and he would produce necessary receipts / vouchers and a proof before releasing the payment or the wood work.

CLAUSE 47: Security deposit will not be re-funded till clearance certificates from Labour Officer is obtained by the contractor.

Signature of Contractor

Executive Engineer
Irrig . & PH Division
Indora (H.P.)

Schedule showing approximately materials to be supplied by the Public Works Department under clause 1 of the conditions of contract for contract for work contracted to be executed and the rate at which they are to be charged for.

Particulars	Rates at which materials will be charged to the contractor		Place of delivery
	Unit	Rs. Paisa	
..-			.

Note: The person or firms submitting the tender should see that the rates in the above schedule are filled up by the Engineer –in-charge on the issue of the form prior to the submission of the tender .

**SAFETY CODE
(REFERRED TO UNDERCLAUSE 19-C OF THE TENDER)**

Safety code:-

(i) Suitable scaffolds should be provided for workmen for all works that cannot safely be done from the ground or from said construction except such short period work as can be done safely from ladders. When a ladder is used an extra Mazdoor shall be engaged for holding the ladder and if the ladder is used for carrying materials as well , suitable foot holds and land holds shall be provided on the ladder and ladder shall be given an inclination not steeper than ¼ to 1(1/4 horizontal and one vertical).

(ii) Scaffolding or staging more than 12 feet above the ground or floor , swung or suspended from an over head support or erected with stationary support shall have a guard rail properly attached bolted, braced and otherwise secured at least 3 feet high above the floor or platform of such scaffolding or staging and extending along the entire length of the outside and ends thereof with only such opening as may be necessary for the delivery of the materials . Such scaffolding or staging shall be so fastened as to prevent it from swaying from the building or structure.

(iii) Working platform , gangways and stairways should be so constructed that they should not sag unduly or unequally and if the height of the platform or the gangway or the stairway is more than 12 feet above ground level or floor level , they should be closely boarded , should /have adequate width and should be suitably fenced as described in (2) , above.

(iv) Every opening in the floor of a building or in a working platform be provided with suitable means prevent the fall of persons or materials by providing suitable fencing or railing whose minimum height shall 3'-0.

(v) Safe means of access shall be provided to all working platforms and other working places. Every ladder shall be securely fixed. No portable single ladder shall be over 30 feet in length while the width between side rails in rung ladder shall in no case be less than 11-1/2 inches for ladder up to and including 10 feet in length. For longer this width should be increased at least 1/4 inches for each additional foot of length uniform step spacing shall not exceed 12 inches. Adequate precautions shall be taken to prevent danger from electrical equipment. No materials on any of the sites of work shall be stacked or placed as to cause danger or inconvenience to any person or the public. The contractor shall provide all necessary fencing and lights to protect the public from accident and shall be bound to bear the expenses of defense of every suit action or other proceedings at law that may be brought by any person for injury sustained owing to neglect of the above precautions and to pay any damages and cost which may be awarded in any such suit, action or proceeding to any such person or which may with the consent of the contractor be paid to compromise any claim by any such person.

EXCAVATION AND TRENCHING

(vi) All trenches, four feet or more in depth. Shall at or time be supplied with at least one ladder for each 100 feet in length or fraction thereof. Ladder shall be extended from bottom of the trench to at least 3 feet above the surface of the ground. The site of the trenches which are 5 feet or more in depth shall be stopped back to give suitable slope or securely held by timber bracing, so as to avoid the danger of sides to collapse.

The excavated materials shall not be placed within 5 feet of the edges of the trench or half of the depth of the trench whichever is more. Cutting shall be done from top of bottom. Under no circumstances under mining or under cutting shall be done.

(vii) **Demolition** before any demolition work is commenced and also during the process the work:

(a) All roads and open areas adjacent to the work site shall either be closed or suitably protected.

(b) No electric cable or apparatus which is liable to be a source of danger over a cable or apparatus used by the operator shall remain electrically charged. (c) All practical steps shall be taken to prevent danger to person employed from risk of the fire of explosion or flooding. No floor, roof or other part of the building shall be so overloaded with debris or materials as to render it unsafe.

(viii) All necessary personnel safety equipment as considered adequate by the Engineer-in-charge should be kept available for the use of the person employed on the site and maintained in a condition suitable for immediate use and the contractor should take adequate steps to ensure proper use of equipment by those concerned. (a) Workers employed on mixing asphaltic materials, cement lime mortars shall be provided with protective foot wear and protective goggles. (b) Those engaged in white washing and mixing or stacking of cement bags or any material which is injurious to the eyes shall be provided with protective goggles. (c) Those engaged in welding works shall be provided with welders provided with welders protective eye lids. (d) Stone breakers shall be provided with protective goggles and protective clothing and seated at sufficiently safe intervals. (e) When workers are employed in sewers and manholes, which are in use, the contractor shall ensure that the manhole covers are opened and are ventilated at least for an hour before the workers are allowed to get into manholes and manholes so opened shall be cordoned off with suitable railing and provided, with warning signals or boards to prevent accident to the public. (f) The contractor shall not employ men and women below the age of 18 years and women on the work of lead painting with products containing lead in any form. Wherever men above the age 18 are employed on the work of lead painting, the following precautions should be taken.

1. (i) No paint containing lead products shall be used except in the form of paste or ready made paint
(ii) Suitable face masks should be supplied for use by the workers when paint is applied in the form of spray or a surface having lead paint dry rubbed and scrapped.
(iii) Overalls should be supplied by the contractors to the workmen and adequate facilities shall be provided to enable the working painters to wash during the cessation of work.
(iv) (a) White lead, sulphate of lead or product containing these pigments, shall not be used in painting operation except in the form of pastes of paint ready for use. (b) Measures shall be taken, whenever practicable, to prevent danger arising out of from caused by the dry rubbing down and scrapping.

(2) (a) Adequate facilities shall be provided to enable working painters to wash during and on cessation of work.
(b) Overall shall be worn by working painters during the whole of working period.
(c) Suitable Arrangement shall be made to prevent clothing put off during working hour being spoiled by painting materials.
(3) (a) case of lead poisoning and of suspected lead poisoning shall be notified and be subsequently verified by medical man appointed by competent authority of HPIPH. (b) The HPIPH may require when necessary medical examination of workers.

(4) Instruction with regard to the special hygienic precaution to be taken in the painting trade shall be distributed to working painters.

ix). When the work is done near any place where there is risk of drowning, all necessary equipment's should be provided and dept ready for use and all necessary steps taken for prompt rescue of any person in danger and adequate provision should be made for prompt first and treatment of all injuries likely to be sustained during the course of the work.

x). Use of hosting machine and tackle including their attachment anchorage and supports shall conform to the Following standards or condition:-

1. (a) These shall be of good mechanical construction, sound material and adequate strength and free from patent defect and shall be kept in good repair and in good working order. (b) Every rope used in hosting or lowering material or as a mean of suspension shall be of durable quality and adequate strength and free from Patent defects.

2. Every crane drive or hoisting appliance operator shall be properly qualified and no person under the age of 21 years should be in charge of any hoisting machine including any scaffold which or give signals to operator.
3. In case of every hoisting machine and of every crane ring hook, suckle shivel and pulley block used in Hoisting or means of suspension the safe working load shall be ascertained by adequate means. Every hoisting machine and all gear referred to above, shall plainly marked with the safe working load. In case of a hoisting machine having a variable safe working load, each safe working load of the conditions under which it is applicable shall be clearly indicated. No part of any machine or any gear referred to above in this paragraph shall be loaded beyond the safe working load except for the purpose of testing.
4. In case of department machine the safe working load shall be notified by the Electrical Engineer –in -Charge. As regards contractors machines the contractors shall notify the safe working load of the machine to the Engender –in –charge whenever he brings any machinery to site of the work and get it verified by the Electrical Engineer concerned.
- x). Motors , Gearing ,Transmission, Electrical wiring and other dangerous part of hoisting appliances should be provided with efficient safeguards, hoisting appliances should be provided with such means as will reduce to the minimum the risk of accidental descent of the load , adequate precautions should be taken to reduce to the minimum the risk of a suspended load becoming accidentally displaced , When worker is employed on electrical installations which are already energized , insulating mats, wearing apparel such as gloves sleeves and both as may be necessary shall be provided , The workers should not wear any rings , watches and carry keys or other materials which are good conductors of electricity.
- xii). All scaffold, ladders and other safety devices mentioned or described herein shall be maintained in sale Condition and scaffold ladder or equipment shall be altered or removed while it is in use. Adequate washing facilities should be provided at or near places of work.
- xiii). These safety provisions should be brought to the notice of all concerned by display on notice board at a prominent place at work spot The person responsible for compliance of the safety code shall be named therein by the contractor .
- xiv). To ensure effective enforcement of the rules and regulation relating to safety precautions. The arrangements made by contractor shall be open to inspection be the Labour Officer, Engineer – in – charge of the department or their representatives.
- xv). notwithstanding the above clauses (i) to (xiv) there is nothing in these to exempt the contractor from the operations of any other Act, or rules in force in the H.P. Government.

MODEL RULES FOR THE PROTECTION OF HEAL AND SANITARY ARRANGEMENTS FOR WORKERS EMPLOYED BY HIMACHAL PRADESH PUBLIC WORKS DEPARTAMENT OR ITS CONTRACTORS.

1. **Application :-** These rules shall apply to all building and construction works in charge of Himachal Pradesh Irrigation & Public Health Department.
2. **Definitions:-**
 - (i) Work place means a place at which at an average fifty or more workers are employed in connection with construction works.
 - ii). Large work place means a place at which, at an average 500 or more workers are employed in connection with constructions work.
3. **First –Aid Facilities**
 - i. At every work place there shall be maintained in a readily accessible place first aid appliance including and adequate supply of sterilized dressing and sterilized cotton wool . The appliances shall be kept in good order and in large work place they shall be placed under charge of a responsible person who shall be available during working hours.
 - ii. The first aid box shall be distinctly marked with a red cross on white ground and contain the following equipment , namely:
 - (a) For work places in which the number of contract labour employed does not exceed 50-each first aid box shall contain the following equipments.
 - i. 6 small sterilized dressing. (ii) 3 medium size sterilized dressing. (iii) 3 large size sterilized dressing. (iv) 3 large size sterilized burn dressing. (v) 1(30ml) bottle containing a two percent alcoholic solution of iodine. (vi) 1930ml bottle containing salvolatile having the dose and mode and administration indicated on the label.
 - vii. 1 rolls of adhesive plaster.
 - viii. 1 snake – bite lancet. xi). 1(30gms) bottle of potassium permanganate crystal. (x) 1 pair scissors.
 - xi. 1 copy of the first aid leaf let issued by the Director , Health Services, Himachal Pradesh.
 - xii. A bottle of suitable surgical antiseptic solution . xiii). Ointment for burns. xiv). A bottle of suitable surgical antiseptic solution.
 - (b) For work places in which the number of contract labour employed does not exceed 500-each first aid box shall contain the following equipments.
 - i. 12 small sterilized dressing. (ii) 6 medium size sterilized dressing . (iii) 6 large size sterilized dressing. (iv) 6 (15 gms) packets sterilize cotton wools (v) 1(60ml) bottle containing a two percent alcoholic solution of iodine . (vi) 1(60ml) bottle containing salvolatile having the dose and mode and administration indicated on the label.
 - vii. 1 roll of adhesive plaster.
 - viii. 1 snake – bite lancet. xi) 1(30gms) bottle of potassium permanganate crystal. (x) 1 pair scissors.
 - xi. 1 copy of the first aid leaf let issued by the Director , Health Services, Himachal Pradesh.
 - A bottle of suitable surgical antiseptic solution . xiii). Ointment for burns. xiv). A bottle of suitable surgical antiseptic solution
3. Adequate arrangements shall be made for immediate recoupmnt of the equipment when necessary.
4. Nothing except the prescribed contents shall be kept in the First-Aid – box.
5. The first Aid Box shall be kept in-charge of a responsible person who always be readily available during the working hours of the work place.

6. A person in-charge of First-Aid box shall be a person trained in First – Aid treatment in work place where the number of contract labour employed is 150 or more.

7. In work places where the number of contract labour employed is 500 or more and hospital facilities are not available within easy distance of the work, First –Aid Posts shall be established and run by a trained Compounder . The Compounder shall be on duty and shall be available at all hours when the workers are at work .

8. Where work places are situated in places which are not towns or cities, a suitable motor transport shall be kept readily available to carry injured person or person suddenly taken ill to the nearest hospitals.

4. Drinking Water:- (a) In every work place , there shall be provided and maintained at suitable places easily accessible to labour , a sufficient supply of cold water fit for drinking .

(b) Where drinking water is obtained from an intermittent public water supply , each work place shall be provided with storage where such drinking water shall be stored .

(c) Every water supply of storage shall be at a distance of not less than 50 feet from any latrine, drain or other source of pollution. Where water has to be drawn from an existing well which is within such proximity of latrine drain or any other sources of pollution. The well shall be properly chlorinated before water is drawn from it for drinking . All such wells shall be entirely closed in and be provided with a trap - door which shall be dust and water –proof.

(d) A reliable pump shall be fitted to each covered well , the trap –door shall be kept locked and opened only for cleaning or inspection which shall be done at least once a month .

5. Washing and bathing places :- (i) Adequate washing and bathing places shall be provided, separately for men and women.

(ii) Such places shall be kept in clean and drained condition.

6. LATRINES AND URINALS :-

i). Latrines shall be provided in every work place on the following scale, namely :- (a) where females are

(b) Where males are employed , there shall be at least one latrine for 25 males.

Provided that here the number of males or males or females exceeds 100, and one for every 50 thereafter .

ii). Every latrine shall be under cover and so partitioned off as to secure privacy , and shall have a proper door and fastenings.

7. Construction of Latrines:- The inside walls be constructed of masonry or some suitable heat resisting non – observant materials and shall be cement washed inside and outside at least once a year .Latrines shall not be of a standard lower than bore- whole system and should have thatched roofs.

(a)Where workers of both sexes are employed there shall be displayed outside each back of latrine and urinal a notice in the language understood by the majority of the workers “for Women Only “ as the case may be.

(b) The notice shall also bear the figure of a man or of a woman , as the case may be.

(c) There shall be at least one urinal for male workers up to 50 and one for female workers up to fifty employed at a time Provided that where the number of male or female workers as the case may be. Exceeds 500 it shall be sufficient if there is one urinal for every 50 males or females up to the 500 and one for every 100 or part thereof , thereafter .

(d) The latrines and urinals shall be adequately lighted and shall be maintained in a clean and sanitary condition at all times.

(e) Latrines and urinals other than those connected with a flush sewerage system shall comply with the requirements of the Public Health Authorities.

(f) Water shall be provided by means of a tap or otherwise so as to conveniently accessible in or near the latrines and urinals.

8. Disposal of excreta- Unless otherwise arranged for by the local sanitary authority , arrangements for proper disposal of excreta by incineration at the work place shall be made by means of a suitable incinerator . Alternately excreta may be disposed of by putting a layer of night soil at the bottom of a pucca tank prepared for the purpose and covering it with a 15 cm layer of waste or refuse & then covering it with layer of earth for a fortnight (when it will turn into manure)

(ix) The contractor shall , at his own expense, carry out all instruction issued to him by the Engineer –in-charge to effect proper disposal of soil and other conservancy work in respect of the contractor : workmen or employees on the site . The contractor shall be responsible for payment of any charges which may be levied by municipals or cantonment Authority for execution of such work on his behalf .

9. Provision of shelters during rest- At every work place shall be provided , free of cost , two suitable sheds one for males and the other for rest separately for men and women for the use of labour . The height of the shelter shall not be less than 11 feet from the floor level to the lowest part of the roof . The sheds should be kept clean and the space should be on the basis of at least 5 square feet per head.

10. Creches :- (a) At every work place , at which 50 or more women workers are ordinary employed . There shall be provided two huts for the use of children under the age of 6 years , belonging to such women . One hut used for infants, games and play and the other as other bed - room . The huts shall not be constructed on a lower standard than following :-

(i) Thatched roofs , (ii) mud floors and walls, (iii) planks spread over the mud floor and covered with matting.

(b) The rooms shall be provided with suitable and sufficient opening for light and ventilation. There shall be adequate provision of sweepers to keep the places clean. (c) The contractor shall supply adequate number of toys and games in the playroom and sufficient number of cots and bedding in the bedroom. (d) The contractor shall provide one Day to look after the children in the creches when the number of women workers does not exceed 50 and the Dais when the number of women workers exceed 50 . (e) The use of the rooms earmarked as creche shall be restricted to children, their attendants and mothers of the children.

11. CANTEEN: -

(1) In every work place where the work regarding the employment of contractor labour is likely to continue for six months and wherein contract labour numbering one hundred or more are ordinarily employed an adequate canteen shall be provided by the contractor for the use of such contract labour. (2) The Canteen shall be maintained by the contractor in an efficient manner. (3) The canteen shall consist of at least a dining hall, kitchen, store room, pantry and washing places separately for workers and utensils. (4) The canteen shall be sufficiently lighted at all times when any person has access to it . (5) The floor shall be made of smooth and impervious material and inside walls shall be lime washed or colour washed at least once in each year. Provided that the inside walls of the kitchen shall be lime washed every

four months. (6) The percents of the canteen shall be maintained in a clean and sanitary condition.(7) Waste water shall be carried away in suitable covered drains and shall not be allowed to accumulate so as to cause a nuisance.(8) Suitable arrangements shall be made for the collection and disposal of garbage. (9) The dining hall shall accommodate at a time 30 percent of the contract labour working at a time .(10) The floor area of the dining hall , excluding the area occupied by the counter and any furniture except tables and chairs shall not be less than one square meter per dinner to be accommodated as prescribed in sub rule 9,11(i) A portion of the dining hall , service counter shall be partitioned off and reserved for women workers in proportion to their number. (ii) Washing places for women shall be separate and screened to secure privacy. (12) Sufficient tables , stools, chairs or benches shall be available for the number of dinners to be accommodated as prescribed in sub rule 9(13) (a) (i) There shall be provided and maintained sufficient utensils, crockery, furniture and any other equipments necessary for the efficient running of the canteen . (ii) The furniture, utensils and other equipments shall be maintained in a clean and hygienic condition. (b) (i) Suitable clean clothes for the employees serving in the canteen shall be provided and maintained . (ii) A service counter if provided shall have top of smooth and impervious materials. (iii) Suitable facilities including an adequate supply of hot water shall be provided for the cleaning of utensils and equipment's .

(14). The food - stuffs and other items to be served in the canteen shall be in conformity with the normal habits of the contractor labour .

(15). The charges for food – stuffs , beverages and any other items served in the canteen shall be based on No Profits , No Loss and shall be conspicuously displayed in the canteen .

(16). In arriving at the price of food -stuffs, and other articles served in the canteen the following items shall not be taken in to consideration as expenditure, namely .

GENERAL SPECIFICATIONS AND CONDITIONS

- While tendering for the work the contractor is supposed to have seen the site of work and on special claims on account of difficulties arising due to the situation of the site will be entertained.
- The work shall be carried out as per the drawings supplied by the department and as per the instructions with up to date correction slips except where otherwise specified in description of items given on the Engineer- in – charge. The General Specification shall be as per printed HP I P H standard specification with up to date correction slips except where otherwise specified in description of items given on the schedule of quantities .
- The contractor shall keep in safe custody all the material issued to him by the department under clause 10 and material should not be removed from the site "the if work "without prior permission of the Engineer – in – charge .

The contractor shall note that the approved quarries of materials as under :-

	Material	Quarry	Material	Quarry
1	Fance Stone	Barog	2 Other Stones ,	Bhatta Kufer / Barog
3	Sand	Barog Deothi	4 Ballast	Barog / Taradevi

4. Hard stone other materials should be obtained from approved quarries .Royalties taxes , Municipal , other incidental charges connected whether with for their supply of the work shall be borne by the contractor himself .
5. When any surplus earth is to be disposal of the site where the earth would be disposed of should be got approved from , Engineer – in – charge in writing before undertaking the work .The disposal of rubbish and malba due to construction work will be the contractor' s responsibility and nothing shall be paid extra for this disposal .
6. Owing to difficulty in obtaining certain material in open market the Govt. have undertaken to supply materials specified on pagesof the tender form at the rates stated therein .There may be delay in obtaining the materials by the department and the contractor is therefore to keep himself in touch with day to day position regarding supply of material from Engineer- in-charge and so adjust the progress of work that his labour may not remain idle nor therefore be any other claim due to or arising from delay in obtaining the material. It should be clearly understood that on claim whatsoever shall be entertained by the Govt. on account of delay in supplying material.
7. The contractor must ensure before taking delivery of materials from stores that these are in good condition and no account of the materials being defective will be entertained later on .If these are delivered at any other side than specified in the agreement the dirrence due to carriage will be adjusted accordingly.
8. The cement shall a stacked by the contractor in a separate godown built by him at his cost having water proof roof and walls and floor consisting of layer of dry bricks/ stone laid on well consolidated earth at least one foot above ground level. These stacks shall be in rows of 2 bags deep and 10 bags high and with minimum 2ft clear space around as per sketch attached .The bags shall be placed horizontally continuous in each line . Nothing extra will be paid for this.
9. The contractor shall be required to make double lock arrangement for storage of cement and other valuable materials at the site of work. One key will remain in the custody of Junior Engineer in charge of the work and the other with the representative of the contractor and locking arrangement should be such that godown cannot be opened unless both the contractor's and Junior Engineer are present. The issue account of all materials issued by the Department will be maintained properly and should be presented for scrutiny whenever demanded by the Department Officers . The contractor will however remain responsible for the safe custody as usual.
10. No hand mixing of the concrete will be allowed .The contractor will have to arrange for the concrete mixer himself. Concrete mixer if available with the department shall be issued to the contractor at the work site at Rs.15/- (Rupees Fifteen only) per full working day .If the mixer is utilized for less than 3 hours half the charges for that will be recovered from the contractor watch and ward of the concrete mixer for the days it remains on the work site (whether working or idle) will be responsibility of the contractor and nothing extra on this account will be paid to the contractors.
11. Hire charges will include the services of the driver and cleaner required and also cost of lubricants stores for cleaning purpose. All other charges such as cost of coal, firewood , matches ,diesel , oil , petrol ,kerosene etc. for running and working of the mixture, pay of Chowkidar for guarding the mixture at night shall however be borne by the contractor. All loses to the machinery due to negligence or theft except for fair wear and tear shall be the responsibility of contractor.
12. IPH truck if available shall be issued at Rs.....Per KM. whether empty or loaded with minimum charges of Rsper day of working hours if the IPH Trucks are not available or are not sufficient to meet the requirement of contractor the department will help the contractor .for arranging Trucks from the transport department provided written request is made for the same by the contractor . For arranging trucks from the Transport contractor will have to pay the amount as per / debit raised by the Transport Department .
13. The contractor will have also to pay token tax to the HRTC for the period he uses the departmental IPH Trucks on his request for bonafide work according to the rates fixed by the corporation . The receipt for payment of token tax to the HRTC will have to be produced by the contractor to the Engineer-in-charge at the time of receiving payment for the work done .
14. In addition to hire charges of department Trucks , the contractor will have to pay the goods tax on approved rates under Goods Taxation Act, 1955 to the Excise Taxation Department for the period departmental Trucks / trucks are / is hired by them / him for bonafide use on the work . The contractor will have to produce necessary receipt in token of having paid to the Goods Tax to the concerned department before receiving the payment from the Engineer –in –charge .
15. The contractor shall also be responsible for watch and ward of other materials issued to him . If contractor fails to provide sufficient fencing lighting and watch & ward to the Engineer-in charge the later after notice to the contractor will provide sufficing fencing lighting and watching staff . the cost of doing so shall fencing lighting and watching shall not relieve the contractor from responsibilities for damages caused by failure on his part.
16. The contractor will produce a certified copy from the industries department that the royalty has been paid by him on account of excavation of stones and sand from other than IPH , road or alternatively recovery of the material excavated and utilized in the construction as per the billed quantities shall be recovered by the department .
- 16(a). The contractor shall have to purchase the timber to be used on work from an authorized dealer/agency and he would produce necessary receipts/vouchers as a proof before releasing the payment of the wood – work.
17. No payment shall be made to the contractor for any damage cause to work from or material by rain/snow or floods or due to any other cause , what so over ever , during the execution of work and no such claim on this account shall be entertained. He will have to make good all such damages .
18. The contractor shall not deposit materials on any site which will seriously cause inconvenience to the public. The Engineer-in-charge may require the contractor the remove any material which is considered by him to be a danger or inconvenience to the public cause then t be removed at the contractors cost.
19. Recovery for damaged materials due to defective storage of material issued by the Department will be recovered from the contractor at double the issue rate. No claim on this account shall we entertained.
20. The contractor should obtain permission from the Executive Engineer for extracting stones From road side or approved quarries and Rs. (.....) % cum will be recovered from him on account of royalty charges for the stones quarried within the acquired width of road shall be paid directly by the contractor to the concerned department / owner.
21. The contractor shall be responsible to make good the damages caused to the lands and buildings of private persons which are continuous or otherwise to the premises which are continuous or otherwise to the premises on which the work or any part of it is being executed and his failure to do so, the same will be made good by the Executive-in charge at the cost of contractor.

22. Any damages during the execution of work will be the responsibilities of the contractor and he will have to restore such damages at his own cost and nothing will be paid by the department on this account.
23. When a road has to be closed to traffic a clear notice at least of 7 days shall be given by the contractor to the Executive Engineer who shall notify it to the Police Authorities and the Transport Department. Adequate number of sign boards for diversion of the traffic shall be arranged and fixed by the contractor at his own cost.
24. A notice board " Road Closed" shall be arranged and fixed by the contractor at his own cost by night. The lanterns should be of standard square pattern. A notice indicating the direction that traffic, should be kept perfectly free from , tools and other constructions should be on through repair as long as the metal led surface is not opened for traffic.
25. Samples of all materials to be used on the work shall be submitted for approval to the Engineer-in-charge before hand. The same principle will hold for the all items of work.
26. The design of shuttering must be submitted by the contractor to the Engineer-in-charge before hand for obtaining his written approval before erection of the same. The contractor shall be entirely responsible for the failure of the shuttering due to non- compliance of the instructions and due to imperfection in erection and execution.
27. All reinforcement has to be placed in the position shown in the drawing. In case any reinforcement is found to have been misplaced/displaced, the contractor alone will be responsible for the same. The Engineer-in-charge will be at liberty to reject all such work as substandard or to deduct for reduction due to wrong placing.
28. All jungle clearance such as shrubs etc. will be done by the contractor at his own cost but the tree big or small shall not be felled without prior permission. Cost of damage to the forest to some other Govt. or private properties will be made good by the contractor at his own cost or recovery shall be made from his bills.
29. The contractor shall remain himself or keep his representative duly authorized at site during all working hours of execution to receive instructions from Engineer-in-charge and to carry out the work accordingly.
30. All material brought to the site of work during the time of execution should be stacked properly as desired by the Engineer-in-charge.
31. The Engineer-in-charge will be at liberty to debit the contract account with any dues outstanding against him in respect of some other work entrusted to him in the Himachal IPH Department.
32. In case the contractor obtains a route permit for plying his own or hired truck for the carriage of materials to the site of work, he shall render a full account of the carriage work by him duly supported with the log book of the vehicles weekly, failing which he will be liable to pay fine at the rate of Rs. 5 per day extra days that the truck has plied.
33. The rates of different items are for all heights depths and width unless otherwise specified against the items.
34. For testing the strength of concrete, cubes shall be prepared by the contractor under the supervision of an officer of the department not below the rank of Assistant Engineer. Samples of concrete and its testing shall be done as per IPH Department specifications and also as per relevant I.S. Codes of practice and tested in a recognized laboratory approved by the Engineer-in-charge. The cost of the making cubes, carriage to laboratory and laboratory charge, should be borne by the contractor. The contractor shall, however, abide by the decision of the Engineer-in-charge, In case the result of test shows the work not up to the specified standard, contractor will carry out any order, necessitated there by at his own cost.
35. The contractor shall get frames and other items of wood work approved by the Engineer-in-charge before fixing the same. All wood work shall be properly seasoned. The wood work should not be painted or treated in any other way until it is approved by the Engineer-in-charge.
36. In case where brick work is exposed and is required to be finished with pointing or otherwise selected bricks should be used and nothing extra will be paid to the contractor on this account.
37. In case of brick work masonry items, the classification of brick brought by the contractor, shall strictly conform to the printed HP IPH Department specifications referred to above irrespective of the classification shown on the permit if any issue to the contractor by the Supply Department. The contractor shall have no claim whatever on this account.
38. The samples of iron fitting and other fittings i.e fan clamps hooks rings wooden hand rail iron railing, paints of different shades marble, chip etc. shall be approved by the Engineer-in-charge before fixing or laying.
39. The contractor shall clear the site properly after the completion of the work.
40. The contractor shall maintain in good condition all work during executing till completion of entire work allowed to the contractor.
41. The contractor must take the precaution to avoid all accidents by exhibiting day and night necessary sign boards, speed limit boards, red flags and red lights and providing barriers. He shall be responsible for all damages and accidents caused due to negligence on his part. No hindrance shall be caused to traffic during the execution of work.
42. Any departmental officer is authorized to have access to the godown for purpose of inspection of materials at any time. Any materials which inspecting officer may point out as being below the required standard will be removed entirely at once from the site of work by the contractor and not used on Govt. work No claim, on this account shall be entertained.
43. Where ever pipes are to be fixed to wall of RCC surface the contractor may be required to use rewal plugs for which nothing extra shall be payable. The contractor shall ensure that vertical pipes are truly/ vertical and horizontal pipes are truly horizontal.
44. In the event of dispute of any kind arising out of this contract the law court at the District headquarter of the Engineer-in-charge or High Court of Himachal Pradesh Shimla shall have the legal jurisdiction. This condition will however not interfere with the arbitration clauses of the contract agreement.
45. Sample of fine sand coarse sand and aggregate shall be got approved by the contractor from Engineer in charge at site before starting the work.
46. The contractor must see the proposed sites for these work and study specification & conditions carefully before tender. The work shall be executed as per programme drawn by the Engineer-in-charge. No extra claim whatsoever arising on variation in site condition encountered etc. shall be entertained .
47. The contractor shall produce a labour clearance certificate from the labour inspector concerned before final payment are released to him.
48. The contractor shall make his own arrangement for obtaining for electric connections if required and make necessary payment to the department concerned.
49. Notwithstanding anything provided and where also the beam below average ground level shall be and paid for in the items of RCC works in raft strips foundations and columns footings.
50. The fair wages to be paid as per clause 19(a) shall be applicable on the date of opening of the tenders or on the date notified by the HP Govt. whichever is later.

51. The contractor shall allow deduction of Income Tax at source as required under section 184c of the Income Tax Act, 1961 as inserted by the Finance Act, 1972
52. For items not covered by the relevant IPH Department Specifications, relevant I.S.I standards for works shall be followed.

ADDITIONAL CONDITIONS

1. The contractor should submit a tentative programme of working within fifteen days of the date of start of work. The contractor will have to work as per programme of the department. No claim whatsoever will be entertained on this account.
2. Unless otherwise provided in the Schedule of quantities the rates tendered by the contractor shall apply to all heights lifts and leads and building and nothing shall be payable, to him on this amount.
3. The structural and architecture drawing shall at all times be properly correlated before executing any work. However, in case of any discrepancy given in the Schedule of quantities appended with the tender and Architecture drawings relating to the relevant item. The former shall prevail unless given in writing by the Engineer - in- charge.
4. The contractor shall be required to produce samples of all buildings materials and fittings sufficiently in advance to obtain approval of the Charge.
5. The contractor shall make his own arrangements for obtaining electric connections, if required and make necessary payments directly to the concerned.
6. No payments shall be made to the contractor for any damage caused by rain, snow fall, floods or any other natural causes whatsoever during the course of work. The damage to work will be made good by the contractor at his own cost, and no claim on this account shall be entertained.
7. Other agencies will also simultaneously execute the works like electrification, horticulture or external services and other buildings works project along with this work in particular. The contractor shall afford necessary facilities for the same. No claim in the matter shall be entertained.
8. Some restrictions may be imposed by the security staff etc. on the working and / or movement of labour materials etc. The contractor shall follow all such restrictions / instructions and nothing extra shall be payable on this account.
9. (a) The buildings work will be carried out in the manner complying in all respects with the requirements of relevant bye-law of the local jurisdiction of which the work is to be executed or as directed by the Engineer-in-charge and nothing extra will be paid on this account.
(b) The work of water supply, internal sanitary installations and drainage work etc. shall be carried out as per local Municipal Corporation bye-laws and the contractor shall produce necessary completion certificate from such authorities after completion of the work.
(c) Water tanks, taps, pipes fittings and accessories should conform to bye-laws and specifications of the municipal body / corporation. The contractor should engage licensed plumbers for the work and get the materials(fixture/fittings) tested by the Municipal body/ corporation authorities, wherever required at his own cost. The work shall be carried out according to Municipal bye-laws.
(d) The contractor shall comply with proper and legal orders and directions of the local or public authority or municipality and abide by the regulations and pay all fees and charges which may be liable.
(e) The sanitary water supply and drainage pipes and fittings and other materials shall be of approved qualities & shall conform to the specifications for work 1977 vol. II with up-to-date and corrected slip and shall be ISI marked. The work shall be carried out without infringing on Municipal bye-laws.
10. The contractor shall take all precautions to avoid all accidents by exhibiting necessary caution boards day and night speed limit boards, and providing barriers. He shall be responsible for all damages and accidents caused due to negligence on his part. No hindrance shall be caused to the execution of the work.
11. The contractor shall give performance test of the entire installation(s) as per standard specification before the work is finally accepted, and the cost of test whatsoever shall be payable to the contractor for the test.
12. Cement bags shall be stored in separate godowns to be constructed by contractor at his own cost as per sketch at page No.----- proof roofs and walls. Each godown shall be provided with a single door with two locks, the keys of one lock shall remain with HP IPH Engineer and that of the other lock with the authorised agent of the contractor at the site of work so that the cement is removed from the godown according to requirement with the knowledge of both the parties and the account maintained in the enclosed proforma at page.
13. M.S. and cold twisted bars flats, tees, angles where stipulated will be issued in available in the stores for all reinforcement items only. No claim on this account shall be entertained.
14. The materials will be issued to the contractor at the place of delivery as mentioned in the scheduled materials. If these are delivered at any other place the difference due to cartage will be adjusted in accordance with clause. 12. The materials will be issued during the working hours and as per rules of godowns as framed from time to time. The contractor shall have to cart at his cost the materials to the site of work as soon as these are issued.
15. The contractor shall bear all incidental charges for cartage storage and safe custody of materials issued by department against damage due to rain, dampness, fire, theft etc. He shall also employ necessary watch and ward establishment for this purpose at his own cost. Nothing shall be paid to the contractor on this account.
16. The standard sectional weights referred to as standard table in HP specifications of works, to be considered for conversion of length of sizes of MS bars and T or steel bars into weight are as under:-

Size(mm) Diameter	Weight K/M	Size(mm) (Diameter)	Weight Kg/m
6	0.22	25	3.855
8	0.395	28	4.836
10	0.62	32	6.316
12	0.89	36	7.994
16	1.60	40	9.869
18	2.00	45	12.490
20	2.45	50	15.424
22	2.99	----	-----

Issue of steel of diameter above 10mm will be regulated on sectional weight basis, weight being calculated with the help of the above table. However, for bars MS/Torsteel up to and including 10mm the following procedure shall be adopted. The average sectional weight for each diameter shall be arrived at from samples from each lot of steel received at site. The actual weight of steel issued shall be modified to take into account the variation.

between actual and the standard coefficients given above and the contractor's account will be debited by the cost of the modified quantity of the decision of Engineer-in-charge shall be final for the procedure to be followed for determining the average sectional weight of each lot.

17. For the purpose of clause 42(iii) of conditions of contract in respect of steel reinforcement bars theoretical consumption will be diameter wise for purpose of panel recovery as envisaged in the said clause.

18. Any cement slurry added over base surface (or) for continuation of concreting for better bond is deemed to have been in built in the item (otherwise explicitly stated) and nothing extra shall be payable (or) extra cement considered in consumption on this account.

19. Testing of Materials:-

(a) Samples of various materials required for testing shall be provided free of charge by the contractor. Testing charges if any, shall be borne by the contractor. All other expenditure required to be incurred for taking the samples conveyance, packing etc. shall be borne by the contractor himself.

(b) In case there is any discrepancy of testing as given in list of mandatory tests and that in individuals sub heads of work as per specifications, the higher of the two frequencies of testing shall be followed and nothing extra shall be payable to the contractor on this account.

20. The contractor shall be responsible to arrange at his own cost all necessary tools and plants required for execution of the work.

21. The contractor shall provide at his own cost suitable weighing and measuring arrangements at site for checking the weight / dimensions as necessary for execution of the work.

22. Rate for all items in which use of cement is involved is inclusive of charges for curing.

23. The foundation trenches shall be kept free from water while all the works below ground level are in progress.

24. Royalty at the prevalent rates whenever payable, shall have to be paid by the contractor on the metal, shingle, sand and bajri etc. or materials collected by him for the work direct to the revenues authority of the District / State Government concerned.

25. The rate of all items of work shall unless clearly specified otherwise include cost of all labour material and other input like involved in execution of the item.

26. For the purpose of recording measurement for preparing running account bill, the abbreviated nomenclature indicated in the publication "Abbreviated nomenclature of items" shall be adopted. The abbreviated nomenclature shall be taken to cover all the materials and operations as per the complete nomenclature of the relevant items in the agreement and other relevant specifications.

27. (i) Tendered rates are inclusive of all taxes and levies payable under the respective status. However, pursuant to the constitution (46th amendment) Act, 1982 if any further tax or levy is imposed by state, after the date of receipt of tenders and the contractor thereupon necessarily and properly pays such taxes/levies, the contractor shall be reimbursed the amount so paid, provided such payment, if any is not in the opinion of Superintending Engineer (Whose decision shall be final and binding) attributable to delay in execution of work within the control of contractor.

(ii) The contractor shall keep necessary books of accounts and other documents for the purpose of this condition as may be necessary and shall allow inspection of the same by a duly authorized representative of Govt. and further shall furnish such other information / document as Engineer-in-charge may require.

(iii) The contractor shall within a period of 30 days of imposition of any further tax or levy pursuant to the constitution of (45th Amendment) Act 1982 give in written not in favour thereof to the Engineer-in-Charge that the same is given pursuant to this condition together with all necessary information relating thereto.

28. In case of PPC is used in addition to the 7 days cube test at least 25% of the tests shall be carried out after 28 days tests are satisfactory. In cases the strength of the concrete as per 28 days tests shall be taken as final for taking action under different clause of the Agreement.

29. The Surplus excavated earth which is beyond the requirement of Govt. Work may be allowed by the Executive Engineer to be disposed off by the contractor on his own or to sell the surplus earth to private parties at his discretion but nothing extra will be paid to carriage or disposal of surplus earth if the same is not required on any Govt. work.

Additional Specifications

1. The entire work shall be done as per HP IPH Specification 1990 Vol. 1 with CS up-to-date and HP IPH specification for works 1990 (Vol-II) with correction slip No.1 up-to-date of tender. However in the event of any discrepancy in the description of any item as given in the schedule of quantities appended above with the tender and specifications relating to the relevant items as per IPH specifications mentioned above the former shall prevail. If the specification for any items are not available in the HP IPH specifications cited above, relevant ISI specification shall be followed. In case ISI specification are also not available, the decision of the Engineer-in-charge given in writing based on acceptable sound Engineering Practice and local usage shall be final and binding on the contractor. The work shall be executed and measured as per metric dimensions given in the Schedule of Quantities, drawings etc. (F.P.S. units wherever indicated are for guidance only).

2. The following modification to the above specification and some additional specification shall however, apply (i) all stone aggregate and stone ballast shall be of hard stone variety to be obtained from approved quarries at or any other source to be approved by the Engineer-in-charge (ii) Sand to be used for cement concrete work mortar and plaster work shall be of standard quality. Sand shall be obtained from to be filled in by EE or any other source to be got approved by the Engineer-in-charge and screened as required. The same shall consist of hard siliceous material it shall be clean sand. If the sand brought to site is dirty, it must be washed cleaned in water and should conform to clause of HP IPH specifications.

3. Wherever any reference to any Indian standard specification occurs in the documents relating to this contract the same shall be inclusive of all amendments issued there to or revisions thereof if any, upto the date of receipt of tenders.

4. The work will be carried out in accordance with the architects drawings and structural Drawings, to be issued by the Engineer-in-Charge. The structural and Architectural Drawings shall have to be properly correlated before executing the work. In case of any difference noticed between architectural and structural drawings, final, decision, in writing of the Engineer-in-charge shall be obtained by the contractor. For items where so required, samples shall be prepared before starting the particular items of work for prior approval of the Engineer-in-charge and nothing extra shall be payable on this account.

5. Articles manufactured by reputed firms and approved by the Engineer-in-charge shall only be used. Only articles classified as "First Quality" by the manufacturer shall be used unless otherwise specified. Articles which bear ISI certification marks shall be used unless

otherwise specified . In case articles bearing ISI certifications marks are not available the quality of samples brought by the contractor shall be judged by the stand laid down in the relevant HP IPH specification, for items not covered by HP IPH specification relevant ISI standard shall apply .

6. The contractor shall give a performance test of installations before the work is finally accepted and nothing extra whatsoever shall be payable to contractor on this account .

7. The work shall be carried out in the manner complying in all respect with the requirements relevant bye-laws off the Municipal Committee / Municipal Corporation / Development Authority . Improvement trust under the jurisdiction of which the work is to be executed or as directed by the Engineer-in-charge and nothing extra shall be paid on this account .

8. Other agencies doing work of electrification , external services other building work , horticulture work etc. for this project will also simultaneously execute the works and the contractor shall afford necessary facilities for the same . The contractor shall leave such necessary holes , opening etc. may be required for the electric and sanitary work etc. and nothing extra or the agreement rates shall be paid for the same .

9. Unless otherwise specified in the schedule of quantities the rates for all items of the work shall be considered as inclusive of pumping out or falling out water if required for which no extra payment will be made . This will include water encountered from any source such as rains ,floods, sub-soil water being high due to any other cause whatsoever .

10. Any cement slurry added over base surface (or) for continuation of concreting for better bond is added to have been in built in the item (Unless otherwise , explicitly stated) and nothing extra shall be payable (or) extra cement considered with consumption on this account .

11. The rate for all items in which the use of cement is involved in include of charge of curing.

12. The foundation trenches shall be kept free from water while all the works below ground level are in progress .

13. The fineness modulus of sand to be used in different works shall be as follows:-

- | | |
|-------------------------------|---|
| 1. Coarse sand,
2.5 to 3.5 | As specified in the item like plain conc .
RCC Work flooring work etc. |
| 2. Fine sand
1.2 to 1.6 | As specified in the item like finishing coat
of cement plaster ,skirting dado etc. |

14. **BRICKWORK:-**

Bricks shall generally conform to specification for brick class 75, Bricks shall not absorb water more than , 20% of their own dry weight after 24 hours immersion in cold water , Both the faces of wall of thickness more than 23 cm shall be kept in the proper plans . Wall of half brick thickness or less shall be measured separately and paid in sqm . Half brick thickness shall be taken as 115 mm . Brick wall beyond half brick thickness shall be measured in multiple of half brick (i.e. 115 mm) which shall be deemed to be inclusive of mortar joints . When a fraction of half brick occurs due to architectural reasons or otherwise as per the requirements of the department the same shall be measured as half brick work provided such fraction exceeds 2 cm , fraction up to 2 cm thickness shall be made up in mortar and paid for as per specified thickness under brick work . Bricks shall be obtained from approved kiln or any other source to be got approved by Engineer-in-charge and shall be of best quality, well burnt ground molded bricks available in the locality .

15. **RCC Work:-**

15.1 In respect of projected balconies, projected slabs at roof level and project varandah, the payment for the RCC work shall be made under the item, of RCC slabs . The payment for centering and shuttering of such items shall similarly be paid under the item of centering and shuttering of RCC slab . Nothing extra shall be paid for the said shuttring at the edges of these projected balconies and projected verandahs. All the exposed edge shall be however, be finished as per specifications and nothing extra shall be paid for this .

15.2 In the item of RCC walls, railings and roof etc. nothing extra shall be paid for making designs as per patterns given by Architects or for thickness of selections .

15.3 The rates for railing are inclusive of all the labour and the materials including execution as given in the description of the item, portion of the railings which is embedded in the masonry of RCC shall not be included for measurements .

15.4 **Precast R.C.C.**

The compactions of the concrete shall be done by vibrating tables or external vibrator, as approved by Engineer-in-charge . The rate quoted for the items shall include the element both for form work and mechanical vibration .

15.5 The water will be tested with regard to its suitability for use in RCC work and nothing extra will be paid for on this account .

16.0 **Flooring:-**

The rate of items of flooring is inclusive of providing sunk flooring in bath rooms, kitchen etc. and nothing extra on this account is admissible .

17.0 **Wood work:-**

17.1 The contractor will be responsible for the watch and ward of shutters handed over to him by the Department for fixing . In case these are stipulated for issue by the Department and nothing extra for the same will be paid .

17.2 Timber as specified to be used for wood work shall be kiln seasoned in the relevant items in the schedule of quantities and shall conform to HP IPH specifications 19990 with correction slips up to date and will be of required variety obtained from approved sources .

17.3 Shutters of panelled doors shall be with kiln seasons secondary species timber frames as per relevant specification of item and with panels of 12 mm thick second class teak wood /15 mm thick deodar wood both kiln seasoned or made phenol from eldehyde glue

processed novateak or equivalent particle board 12 mm thick with or without commercial ply veneer focus on both sides as indicated in relevant items .

17.4 The panelled shutters shall be kiln seasoned with species as specified in items (styles and rails) as per width shown in Architect drawings . Panels shall be embedded into frames to a minimum of 12 mm with 1.5 mm gaps .

17.5 Permissible tolerance on wood work shall be as under :-

- (a) Door frames of 3 mm (b) Door shutters (c) On width and height of 3mm .
(i) On width and height of 3 mm (ii) On thickness of 1.2 mm .

17.6 The samples of species to be used shall be deposited by the contractor with the EE before commencement of the work . The contractor shall produce cash vouchers and certificates from standard kiln seasoning plant operator about the timber section to be used on the work having been kiln seasoned by them failing which it would not be so accepted as kiln seasoned .

17.7 Transparent sheet glass conforming to IS 1761- 1960 shall be used thickness being governed as under unless otherwise specified in the item .

Area of glazing	Thickness	Max Unsupported(Length)
For glazing area up to 0.2 sqm	3 mm	60 cm
For glazing area from 0.2 sqm To 0.5 sqm	4 mm	120 cm
For glazing area more than 0.5 sqm	5.5 mm	120 cm
Glazing for toilets and in fixed ventilators shall be of opaque type .		

17.8 Factory made shutters as specified shall be obtained from factories to be approved by the Engineer-in-charge and shall conform to IS 2202 (part-1) 1977 .The contractor shall inform well in advance to the Engineer-in-charge the name and address of the factory where from the contractor intends to get the shutters manufactured .The contractor will place order for manufactured of shutters only after written approval of the Engineer-in-charge in this regard is given . The contractor is bound to abide by the decision of the Engineer-in-charge and recommended a name of another factory from the approved lists in cases the factory already proposed by the contractor is not found competent to manufactured quality shutters .

The contractor will also arrange stage wise inspection of the shutters at factory , of the Engineer-in-charge or his authorized representative . Contractor will have no claim if the shutters brought at site are rejected by Engineer-in-charge in part or in full lot due to bad workmanship/quality/ Such shutters will not be measured and paid and the contractor, shall remove the same from the site of work within 7 days after the written instructions in this regards are issued by Engineer-in-charge or his authorized representatives .

18.0 Steel Work :-

18.1 The rate of T/angle iron frames shall include the following :-

(a) M.S. Steel tie of 16 mm dia bar shall be welded to T-iron door frames to keep the frame vertical in correct position . The steel /tie shall be embedded in floor concrete . No ties is necessary for windows frames . In the case of window frame 2 lugs 15x3 mm long shall be welded to each vertical number of the frame .

(b) Each T iron frame for doors shall have 4 Nos. M.S. lugs 15x3 mm long shall be welded to each member of frame .

(c) M.S. flat 8x25mm, 100 long having threaded holes (No. of flats shall correspond) to the No. of butthings to be fixed to door /window shutter) shall be welded at appropriate places at the back of the T-iron frames for fixing the required butthings to the frame with machine screws . M.S. flats 8x25 mm, 50 mm long with threaded holes shall be welded to the back of the T-sections to receive the butt hinges for the cleats .

18.2 The M.S. flat clamps 15x6 mm thick for holding arrangements are to be provided and added as per site conditions . The rate is inclusive of the cost of such clamps .

18.3 The site tie lugs ,curtain brackets and flats welded for fixing hinges and cleats shall not be measured for the purpose of payment .

18.4 All welding work shall be tested for quantity of weld as laid down in IS 822-1970 before actual erectoin ,Wherever it appears shall mean . Continuous fillet welding .

19.0 Water supply sanitary installations

19.1 Sanitary fittings paints and other materials shall be obtained from one of the firms on the list of approved manufacturers of HP IPH and shall bear ISI mark . The material shall be tested as per provision in relevant IS codes .The contractors rates for items involving the use of the above materials shall be deemed to cover the cost of samples .

19.2 The SCI pipes and GI pipe wherever necessary shall be fixed to RCC columns, beams etc with raw plugs and nothing extra shall be paid for this .

19.3 G.I. pipes if stipulated for issue in the schedule of material can be issued in inch sizes or its equivalent metric size as considered fit and the issue rate recoverable from the contractor will remain the same . The contractor will not be paid anything extra on this account and nothing will be deducted for using the size of G.I. pipes issued and the items will be paid as per agreement rate for the same item .

19.4 The contractor shall be responsible for the protection of the sanitary and water supply fittings and other fittings and fixture against pilferage's and breakage during the period of installation and there after until building is handed over .

19.5 Water tanks, taps, pipes fittings accessories should conform to bye laws specification of the municipals bodies corporations etc. The contractor should engage licensed plumbers for the work and get the material (fixtures fittings tested by the Municipal bodies /corporation authorities wherever required at his own the work shall be carried out according to the municipal bye laws .

19.6 The P or S trap in the 'c' shall be of deep seal type and shall have minimum water seal of 75 mm and floor traps shall have minimum seal of 50 mm .

20.0 Variation in Consumption of Materials:-

The variation in consumption of materials shall be governed as per HP IPH specification and clauses of the contract of the extent applicable . The following specific clauses shall govern the variation in consumption of pig lead .

21.0 Variation on consumption of Pig Lead :-

21.1 The pig led for caulking of joints of SCI pipes shall be issued as per theoretical consumption for SCI pipes of size 100 mm, 75 mm at 0.98 kg and 0.77 kg per joints respectively .Over and above the theoretical quantities of lead as marked out variation of 5% shall be allowed for wastage etc. Any difference between the actual consumption of pig lead and theoretical consumption worked out on the above basis including the authorized variation shall be recovered at double the issue rate . Where the pig lead is arranged by the contractor variation of 5% will be allowed in case the variation is on higher 5% will be allowed . In case the variation is on lower side, the quantity of piglead used less shall be recovered from the contractor at market rate to be determined by Engineer-in-charge whose decision on the matter will be final .

21.1 The theoretical quantity of cement to be utilized in item of concrete involving use of single aggregate and mixed volume batching shall be computed on the basis of the co-efficient for cement to be used in different item of the work provided in DSR reducing each of the co-efficient by 5% however where the concrete is mixed by weight batching no such reduction shall be made from theoretical co-efficient given in DSR for concrete with crushed stone aggregate .

22.0 **CONDITIONS:-**

22.1 The contractor will have to work according to the programme work, decided by the Engineer-in-charge .The contractor shall also construct a sample unit complete in all respects within three months from the date of ward of work and this samples unit shall be got approved from the Engineer-in-charge before mass construction is taken upto extra claim whatsoever beyond the payments due at agreement rates will be entertained from the contractor on this account .

22.2 The contractor shall take instructions from the Engineer-in-Charge regarding collection and stacking of material in any place No excavated earth or building materials shall be stacked on areas where other buildings roads, services of compound walls are to be constructed .

22.3 Royalty at the prevalent rates shall have to be paid by the contractor on the boulders, metal, shingle, sand and bajri etc. or any other material where royalty is payable collected by him for the execution of the work direct to the revenue authority of the Mineral Department concerned HP Government .

22.4 The contractor shall make his own arrangements for obtaining electric / water connections if required and make necessary payments directly to the Department concerned .

22.5 The contractor must take all precautions to avoid all accident by exhibition necessary day and night caution boards, speed limit board, red flags, redlights and by providing barriers . He shall be responsible for all damages and accidents caused due to negligence in this regards No. hindrance shall be caused to Traffic during the execution of work .

22.6 The contractor shall maintain in perfect condition all works executed till the completion of the entire work allotted to him . Where phased delivery is contemplated the provisions mentioned above will apply to each phase .

22.7 No compensation shall be payable to the contractor for any damage caused by rains, lighting wind, storm, floods, tornadoes, earthquakes or other natural calamity during execution of work . He will make good all such damages at his own cost and no claim on this account will be entertained .

22.8 The contractor shall clear the site thoroughly of all scaffolding materials and rubbish etc . left out of his work and dress the site around the building to the satisfaction of the Engineer-in-charge before the work is considered as a complete .

22.9 All material obtained from Government stores or other work shall be got checked from the Engineer-in-Charge or his representative on receipt of the same at site and before they are actually used .

22.10 If as per municipal rules the huts for labour are not be erected at the site by the contractors . The contractors are required to provide such accommodation as is acceptable to local bodies and nothing extra shall be paid on this account .

22.11 The centering and shuttering required for RCC work will be brought to site by the contractor well in advance so that the progress of the upper floors is not hampered due to non availability of the same . Nothing extra shall be paid for this .

22.12 The contractor must see the proposed site for the work, study specifications and condition carefully before tendering . No claim of any sort shall be entertained on account of any site condition or ignorance of specifications and conditions .

22.13 The site is available and tenderer should see the approaches and conditions of the same . If any approach from main road is required at site or existing approach is to be improved and maintained, for cartage any materials by the contractors, the same shall be provided improved and maintained by the contractor at his own cost .

22.14 Machine made shutters shall be got approved from the Engineer-in-Charge at factory site before carting the same to the site of work . The shutter damages during and cartage shall not allowed to be used in the work and shall be removed by the contractor at his own cost and no claim whatsoever shall be entertained in this regard .

23.0 **Conditions for issue of materials**

23.1 The materials will be issued to the contractor at the place of delivery as mentioned in the schedule of materials during the working hours as per rules of the HP IPH stores as in force from time to time . If these are delivered at any other site, the difference on account of less or more cartage will be adjusted accordingly . The contractor shall have to cart the materials to the site of work at his cost as soon as these are issued .

23.2 The materials like reinforcing bars, flats, tees, angles sheets, CI and SCI pipes etc . contemplated to be issued will be issued in available sizes and lengths and the contractor shall bear the cost of cutting and shaping them according to the requirements of work . No claim for the wastage on this account shall be entertained .

23.3 The size of the cement godown indicated in the sketch is only for guidance . The actual size of the godown shall be as per site requirement and nothing extra will be paid for the same .The decisions of the Engineer-in-charge regarding the capacity needed will be final .

23.4 The contractor shall be fully responsible for the safe custody of the material issued to him even if the materials are under double lock system .

23.5 The account daily receipts and issues of cement shall be maintained in registered in the prescribed proforma signed daily by the contractor or his authorized agent in token of its correctness .

23.6 The contractor shall construct suitable godowns yards at the site of work for storing all other materials so as to be safe against damaged by sun, rain dampness fire theft etc . at his own cost and also employ necessary watch and ward establishment for the purposes at his cost . Materials to be charged directly to work and stipulated for issue free of cost shall also be issued to contractor as soon as they are received at site or at the stipulated place of issue the provisions of this clause will equally and fully be applicable to these item as well .

23.7 Issue of steel of diameter above 10 mm will be regulated on sectional weight basis, weight being calculated with the help of the above tables . However, for bar MS/T or steel up to and including 10 mm, the following procedure shall be adopted . The average sectional weight for each dia, shall be arrived at from samples from each lot of steel be modified to take in to account the variation between the actual and the standard co-efficient given above and the contractor account will be debited by the cost of this modified quantity only . The decision of the

Engineer-in-charge shall be final for the procedure to be followed for determining the average sectional weight of each lot . Quantity of each diameter of steel received at site of work each day will constitute the single lot for thus purpose .

23.8 For standard sectional weight of steel standard tables referred in para 5.3.3 in specifications for works 1977 volume 1 to be considered for conversion of length of various sizes of M.S or for steel bars in to weight steel bars to be issued would be only for reinforcement works in RCC and not to cover any other items .

24.0 **CLARIFICATION REGARDING PLINTH LEVEL :-**

24.1 For the purpose of operation of clause 12(vi) the following works shall be treated as works relating to foundations :-

- (a) For buildings, compound walls plinth level (or) 1.2 meters (4 feet) above ground level whichever is lower, excluding items of flooring and DPC but including base concrete below the floors .
- (b) For abutment, piers, retaining walls of culverts and bridges, wall of water reservoirs . The floor level or where floor is not determinate, up to 12 meter above bed level .
- (c) For retaining wall where the floor levels in hot determinate up to 1.2 meter above average ground level or bed level .
- (d) For roads, all items of excavation and filling including treatment of sub base and soling work .
- (e) For water supply lines, sewer lines, underground storm water drain and similar works, all items of work below ground level except items of pipe and masonry work .
- (f) For open storm water drains all items of work .

25.0 **TESTING OF MATERIALS :-**

- (a) The contractor shall produce all the materials in advance so that there is sufficient time for testing of the materials and clearance of the same before use in work .
- (b) Samples of various materials required for testing shall be provided free of charge by the contractor, testing charges if any, shall be borne by the Department . All other expenditures required to be incurred for taking the samples conveyance packing etc. shall be borne by the contractor himself .
- (c) In case there is any discrepancy in frequency of testing as given in list of mandatory tests and that in individual sub heads of work as per HP IPH specifications 1977 (Vol 1) the higher of the two frequencies of testing shall be followed and nothing extra shall be payable to the contractor on this account .
- (d) The contractor shall be responsible to arrange at his own cost all necessary tools and plants required for execution of work .
- (e) With a view to avoid controversy about quality or cement concrete as revealed in the test results of 7 days cubes falling short of the prescribed standard by over 10 % to 20 % and pending testing of balance 3 cubes for 28 days as final confirmatory acceptance test crushed samples of cement concrete from the failed 7 days cubes should be preserved in a sealed bag .

26.0 **Integral Water Proof Finishing (f) = PPCCS -2 attached**

26.1 The contractor must associate himself with the specialized firm to be approved by the Engineer-in-charge in writing for integral cement based water proofing treatment for sunken floors and on roofs 10 years guarantee in prescribed proforma attached must be given by the specialized firm which shall be counter signed by the contractor in token of his overall responsibility . In addition 10 % (ten percent) of the cost of these items would be retained as guarantee to watch the performance or the work done however half of this amount withheld would be released after five years if the performance of the work done is satisfactory . If any defect is noticed during the guarantee period, it should be rectified by the contractor within seven days and if not attended to the same will be got done from another agency at the risk and cost of the contractor . However, this security deposit can be released in full if bank guarantee of equivalent amount for 10 years is produced and deposited with the department, while tendering the contractor must give :-

- (a) The name of the specialized firm .
- (b) The trade names of the product which would be used .
- (c) List of works where this treatment has been used .
- (d) Quality of chlorides and sulphides used in the product .

(Contractor.....)
